“

The Dual Chain is an easy to use, easy to install barrier made to help protect workers in a loading dock environment.

”

Pair a loading dock's fast-paced nature with summer's predictably high temperatures and workers can be exposed to some harsh work environments. With the presence of the Dual Chain, facilities are able to leave dock doors open while having the peace of mind that their workers are protected from falling hazards. Adding this cost effective barrier option is a summertime no-brainer.
