High Impact LED™ Dock Light

The High Impact LED™ Dock Light from APS Resource is designed for your most demanding applications at the loading dock. The rugged, cast aluminum housing with poly-carbonate lens is engineered to withstand impact at the loading dock without damage to the light. Bright, energy efficient 18 watt LED with 60,000 hour lamp life saves on utility, maintenance and replacement costs. The High Impact LED Dock Light can be easily retrofitted to existing dock arms or can be mounted remotely.
